

PMAPS poem, 9:th PMAPS, Stockholm, June 12, 2006, by Lennart Söder

PMAPS

That is why we are here  
After PMAPS  
Everything will be clear  
Because now when we are in it  
What's coming is probabilistic  
But on Friday when it's over  
It has changed to statistics

So welcome to the sessions  
Where different professions  
Will give you the impression  
That they understand regression  
But after some of the sessions  
You will need some more lessons  
Because of time compression  
They don't show all expressions

In the local organization  
We planned each presentation  
Monte Carlo simulation  
Or distributed generation  
Wind power integration  
Or stochastic optimization  
Information on risk mitigation  
Or system transformation

Yes PMAPS  
That is why we are here  
After PMAPS  
Everything will be clear  
Because now when we are in it  
What's coming is probabilistic  
But on Friday when it's over  
It has changed to statistics

There are papers in a track  
That treats reliability  
And in a load flow the slack  
Can have unclear ability  
Some use PC some use Mac  
For simulating probability  
There is positive feedback  
On the methods credibility

You know for power plant commission  
You will need some permissions  
Before you take the decision  
Otherwise you go to prison  
But with a method with good precision  
Use addition and division  
You treat CO-2 emission  
And then you take the right decision

Yes PMAPS  
That is why we are here  
After PMAPS  
Everything will be clear  
Because now when we are in it  
What's coming is probabilistic  
But on Friday when it's over  
It has changed to statistics

So don't be deterministic  
Just be more realistic  
Treat the stochastic characteristic  
And be more probabilistic  
But don't be too drastic  
Fuzzy sets make limits elastic  
Everything is stochastic  
I mean PMAPS is fantastic

You know the story of PMAPS  
Goes back to eighty-six  
In Toronto the first symposium  
Had an interesting paper mix  
After Oakland, London and Rio,  
I think you heard the names  
We had Vancouver and Madeira,  
Naples and Ames

Yes PMAPS  
That is why we are here  
After PMAPS  
Everything will be clear  
And now we are in Stockholm  
For PMAPS number nine  
We hope you enjoy the conference  
And that the weather will be fine
