

Thesis Project in Sustainable Finance Analytics

At Sandvik Group Sustainability, we have an exciting opportunity for a master thesis project. The project involves combining sustainability and financial metrics, analyzing sustainability data, and developing measures for sustainable finance. Are you up for the challenge?

Background

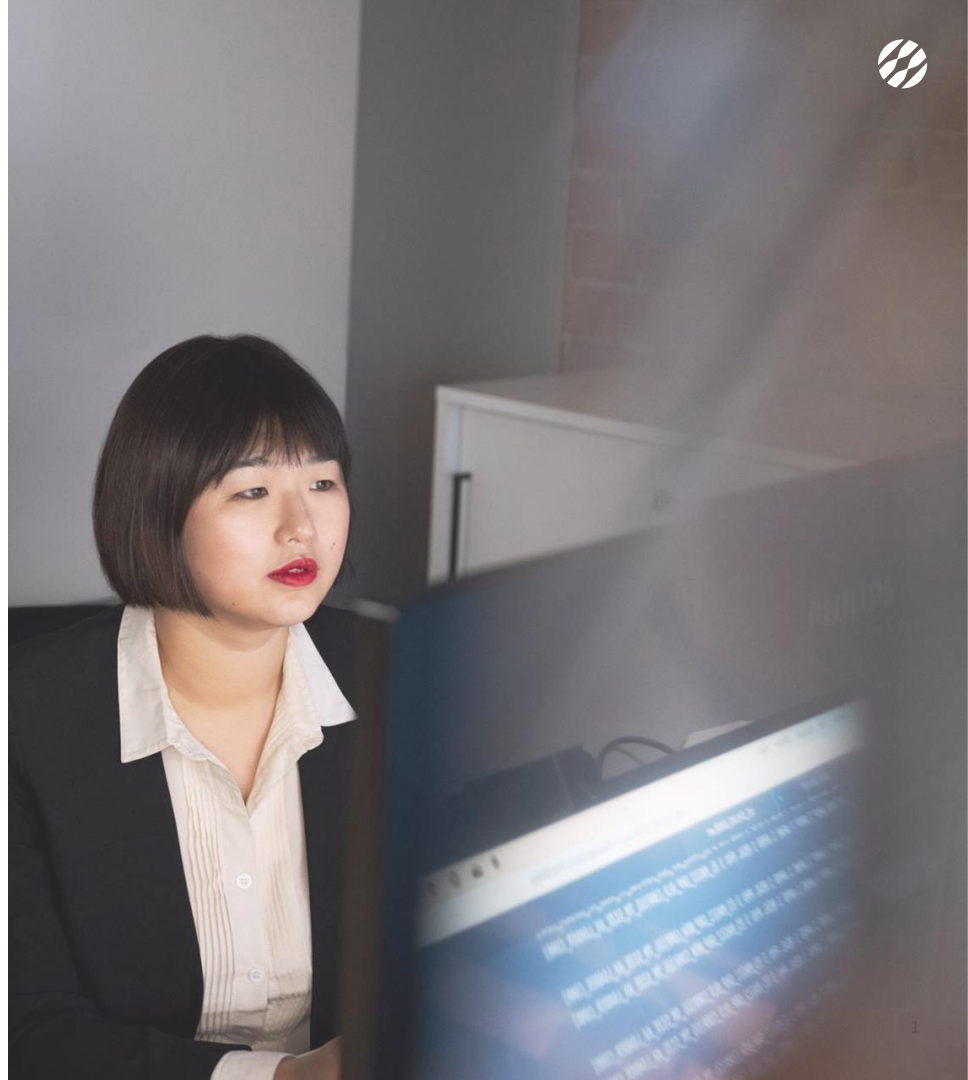

We are approaching a point where financial figures alone are no longer the sole focus in decision-making. New regulations aim to create reporting that allows investors to transparently compare not only financial performance but also sustainability across companies, emphasizing the importance of combining these metrics for informed decisions. However, there are no best practices on how this should be measured, in the same way as for financial key figures, and guidelines need to be investigated.

Your mission

- Combine sustainability and financial metrics by identifying and analyzing suitable metrics that intersect environmental and financial measures.
- Suggest analytics for the relevant sustainability data from, identifying suitable metrics from internal, investors, and customers perspective.
- Analyze relevant assessment and comparison method between companies and sites in relation to relevant measures such as predicted financial growth as an effect of sustainability and environmental impact in relation to turnover.

Your background

We are primarily looking for someone studying engineering or business within the fields of sustainability, environmental science, finance, or related. You should have a genuine interest in data analytics, financial metrics, corporate evaluation, and sustainability. Experience in independent research and data analysis is highly valued.

General information

Thesis hosts

- The thesis is hosted by Sandvik Group Communication, located at World Trade Center, Stockholm

About us

- Sandvik Group Sustainability is a part of the Sandvik Group, a global leader in engineering solutions. We are committed to conducting business in a sustainable and responsible manner, supporting our customers in their transition towards sustainability.

How to apply

- Register your interest by emailing your CV and transcript of record (including grades) to filip.lvarsson@sandvik.com
