

Welcome to the 9th annual Applied Physics Day
November 22nd, from 14.00 at AlbaNova

The annual meeting point for new and old colleagues at Applied Physics is now a tradition. This year will be the ninth in order since the start 2009. The purpose is to increase interaction, integration and links between present groups and staff as well as previous staff members.

We will start at AlbaNova with talks by Applied Physics speakers, career reflections by Applied Physics alumni, a poster session and dinner at Syster O Bror. The detailed program containing speakers and timeline will be posted when confirmed.

Fill out the attendance form at Aphys website (www.aphys.kth.se) and click Applied Physics Day and you'll find the form. Confirm your participation before November 14th.
