

Sustainable, regional aviation –
Made in Sweden!

Braathens Regional Airlines

Fossil free domestic aviation 2030 is our goal.

- First airline to become ISO14001 certified in 2009
- Operate with fuel efficient ATR 72-600 turboprop
- First airline to offer bio fuel to customers (2017)
- First airline to climate compensate for all emissions of Green House gases (2019)

ATR Normal

ATR Eco

L/passenger

What is ATR Eco?

- Straight flight route
- Higher cruising altitude
- Descent with low thrust (slower speed)
- Aircraft center of gravity optimization

1,5 L/passenger

Biofuel

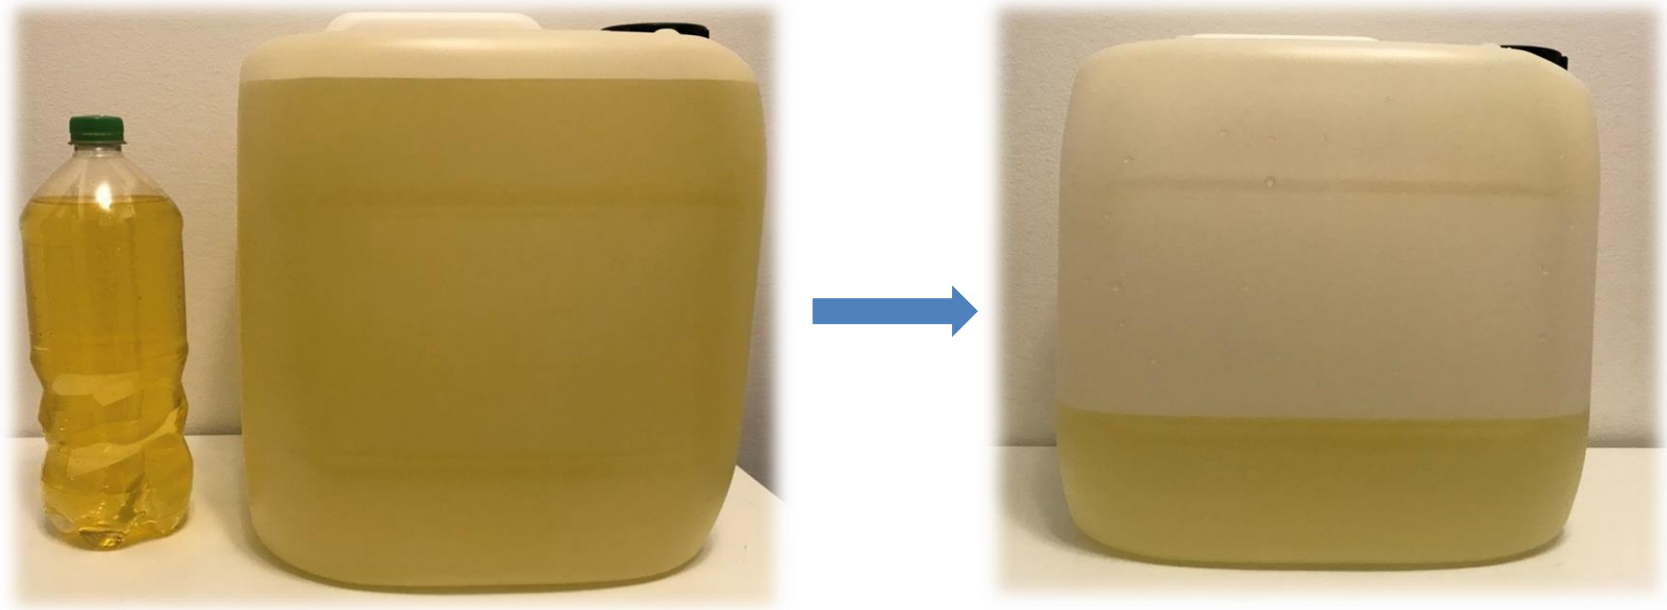

Fossil fuel L/passenger

5,6

The Perfect Flight

The Perfect Flight

By optimising The Perfect Flight, we managed to
reduce the flight emissions with

49 %

Flight emission data/passenger km

100% fossil fuel:

63 g CO₂

50% biojet fuel mix:

35 g CO₂

To make every flight close to perfect,
we need sustainable and affordable
bio fuel to be produced in larger
scale in our region.

Thank you!
