

AG2117 Regional Planning Project 7,5 hp

Regional Planning Project

När kurs inte längre ges har student möjlighet att examineras under ytterligare två läsår.

Fastställande

Kursplan för AG2117 gäller från och med HT07

Betygsskala

A, B, C, D, E, FX, F

Utbildningsnivå

Avancerad nivå

Huvudområden

Samhällsbyggnad

Särskild behörighet

AG2116 City Networks in Regional Contexts
or equivalent

Undervisningsspråk

Undervisningsspråk anges i kurstillfällesinformationen i kurs- och programkatalogen.

Lärandemål

The aim of the course is to develop the students' abilities to handle complex planning situations where diverse and sometimes conflicting interests are to be treated: social issues, economic growth, ecological concern, cultural values etc. The intention is to foster a critical and creative approach for coming practical and theoretical work in the field of regional planning.

Kursinnehåll

In the course, which is organized as a planning project, students will have the opportunity to practice the range of skills acquired during earlier courses. The project task will concern spatial and economic development strategies for sustainable regional structures. The project encompasses the whole planning process. It addresses problem-solving techniques as well as decision-making processes. A large emphasis is put on the ability to communicate intermediate and final results. Students will have the possibility to pursue a particular line of interest of their choice within the larger topic of the project, thus giving room for specialization. The project will be carried out in cooperation with the relevant public and private bodies of the region studied, and the results of the student work will be communicated to private and public actors in the project region. There will be course elements in the project aiming at providing insights into how the increasing European integration will reshape the economic and social conditions in metropolitan regions as well as in smaller settlements and rural areas.

The starting point will be an analysis of the topic chosen by the students or of the geographical area within the region selected from the point of view of history, present conditions and alternative futures. The analysis will contain social, economic and environmental aspects and planning methods taught in earlier courses in the program. The second phase of the project work is synthesizing. Here the task is to design an action program for the issue or area selected. In particular, problem solutions are to be put together which promote integrated wholes. The program will make reference to the connections between different actors and different planning levels. The third phase of the project is devoted to designing strategies for implementation. Here it is necessary to devote attention to the presentation of plan proposals or strategies.

Kurslitteratur

To be announced at the beginning of the course.

Examination

Examinator beslutar, baserat på rekommendation från KTH:s handläggare av stöd till studenter med funktionsnedsättning, om eventuell anpassad examination för studenter med dokumenterad, varaktig funktionsnedsättning.

Examinator får medge annan examinationsform vid omexamination av enstaka studenter.

Övriga krav för slutbetyg

Approved project group work (PRO1; 5,5c) and individual exercise (ÖVN1; 2c)

Etiskt förhållningssätt

- Vid grupparbete har alla i gruppen ansvar för gruppens arbete.
- Vid examination ska varje student ärligt redovisa hjälp som erhållits och källor som använts.
- Vid muntlig examination ska varje student kunna redogöra för hela uppgiften och hela lösningen.
