

# **AG2129 Project Sustainable Urban Planning - Strategies for Urban and Regional Development**

## **15.0 credits**

**Projekt hållbar stadsplanering - strategier för urban och regional utveckling**

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

### **Establishment**

Course syllabus for AG2129 valid from Autumn 2021

### **Grading scale**

A, B, C, D, E, FX, F

### **Education cycle**

Second cycle

### **Main field of study**

Built Environment

### **Specific prerequisites**

In total 180 ECTS-credits, including 90 ECTS-credits within the subject architecture, urban and regional planning or environmental science or 60

ECTS-credits from the Master's programme in Sustainable Urban Planning and Design

English 6

## Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

## Intended learning outcomes

The overall aim of the course is to develop the students' abilities to handle complex planning situations where diverse and sometimes conflicting interests are to be treated: social integration, economic growth, ecological concern, cultural values etc. The intention is to foster a critical and creative approach for coming practical and theoretical work in the field of urban planning.

After fulfilling the course requirements, students should be able to:

- carry out a comprehensive analysis of a project area using different qualitative and quantitative tools in order to identify problems, conflicts and needs in the project area.
- develop a plan for the development of the project area considering the long-term interests on local and regional level.
- draw up an implementation plan for the proposed development in which the key actors, who have the capacity to contribute to the implementation of the proposed development, are identified and a funding strategy is set up.
- critically reflect on the implications of the proposed development for different focus groups in the project area and identify obstacles and impediments that could undermine the proposed development
- prepare an oral and written presentation using visuals, texts and tools that effectively communicate the core features of the proposed development and implementation plan

## Course contents

In this course the collected knowledge in urban and regional is applied in a practical setting. The project encompasses the whole planning process for a specific urban area for which contemporary planning issues are addressed and analysed using the range of knowledge, tools and skills acquired during the previous stages of the students' studies. In the project, proposals for action both in terms of the physical environment and the planning process will be developed. A large emphasis is put on the ability to communicate intermediate and final results. Students will have the possibility to pursue a particular line of interest of their choice within the larger topic of the project, thus giving room for specialization.

## Examination

- PRO1 - Group Assignment, 7.5 credits, grading scale: A, B, C, D, E, FX, F
- PRO2 - Project, 3.0 credits, grading scale: A, B, C, D, E, FX, F
- SEM3 - Seminars, 2.0 credits, grading scale: P, F
- ÖVN2 - Individual Assignment, 2.5 credits, grading scale: A, B, C, D, E, FX, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

## Other requirements for final grade

Group work (PRO1; 7,5 cr), individual assignment (ÖVN2; 2,5 cr PRO2 3,0 cr) and Seminars (SEM2; 2, cr)

## Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
