

AH2173 Planering och analys av kollektivtrafiksystem 7,5 hp

Public Transport

När kurs inte längre ges har student möjlighet att examineras under ytterligare två läsår.

Fastställande

Kursplan för AH2173 gäller från och med VT10

Betygsskala

A, B, C, D, E, FX, F

Utbildningsnivå

Avancerad nivå

Huvudområden

Samhällsbyggnad

Särskild behörighet

Sökande bör ha civilingenjörs- eller MSc-examen, helst inom trafik- eller samhällsplanering, eller kompetens rörande kollektivtrafik förvärvad i arbetslivet. Kursansvarig avgör huruvida arbetslivserfarenheten räcker för antagning.

Undervisningsspråk

Undervisningsspråk anges i kurstillfällesinformationen i kurs- och programkatalogen.

Lärandemål

Students should after the course know PT's role in society, its development potential and its shortcomings. They will know market conditions, supply characteristics and basic planning methods as well as how public transport industry can be organised. The knowledge should be a good start to work with public transport and planning and trigger an interest to do this. The student should be able to discuss PT's future prospects outgoing from today's knowledge and visions.

Kursinnehåll

Students should after the course

about the PT market:

- be able to discuss PT's role in society to fulfil various political goals
- describe PT's market; target groups, market shares, weak and strong markets
- describe different market analysis methods
- know the conception of valuation and explain how it relates to transport forecasts and social economic calculus
- give an account of the magnitude of passengers' valuations of for exemple travel time, waiting time, interchanges and comfort attributes.

about supply, planning and methods:

- be able to explain different steps in public transport planning
- describe characteristics of different PT systems including rail and bus systems, paratransit and new transportation systems
- by oneself make realistic assumptions about capacity measures and calculate on some line dimensioning
- describe good and not so good conditions for PT in geographical planning
- describe design and aim of various infrastructure elements for bus, light rail, metro, local train and elevated beam transport
- having planned (in a teamwork) a rough dimensioning of public transport network in a city or part of town and also self-critically explain and comment the work
- produce a written report that is similar to a consultant report
- know how to run basic functions in VISUM or a similar planning tool for public transport

about organisation, IT and environment:

- give examples of how PT is organised in different parts of the world and having an understanding of the Swedish model
- be able to sketch and explain design and aim of ITS for traffic control and passenger information
- describe PT's own environmental contribution and how it measures relative car transport

Course activities

This course consists of lectures with student participation, one or more exercises, some in the form of a project, study visits and examination in different ways and at more times during the course. Preparation tasks can be included. An extra task will be determined with those who wish to raise their marks.

Kurslitteratur

Course literature will be

- a binder with KTH texts and other articles/papers in English
- a PT book in English (probably White P., Public Transport: its planning, management and operation)
- a relevant report or book of your choice
- search on Internet

Examples of books:

- Bruun, E., Better Public Transit Systems, 2007
- Hensher, D., Bus transport: Economics, policy and planning, 2007
- Vuchic, V.R., Urban Transit. Operations, Plannings and Economics, 2005
- White, P., Public transport: Its planning, management and operation,

2002

Utrustning

A laptop or other computer will allow you to download the program for the project.

Examination

- PRO1 - Project, 4,0 hp, betygsskala: A, B, C, D, E, FX, F
- TEN1 - Examination, 3,5 hp, betygsskala: A, B, C, D, E, FX, F

Examinator beslutar, baserat på rekommendation från KTH:s handläggare av stöd till studenter med funktionsnedsättning, om eventuell anpassad examination för studenter med dokumenterad, varaktig funktionsnedsättning.

Examinator får medge annan examinationsform vid omexamination av enstaka studenter.

PRO1Project4,0A-FTEN1Examination3,5A-F

Övriga krav för slutbetyg

Written examination (4,5 hp) and exercises and projects (3hp)

Marks (A-F) will be given. They will be based on your achievements of knowledge and skill to explain to others what you have learned. They will also be based on your achievements

- in the exercises
- the skill of presenting your results in written reports and in verbal presentations
- if you explain your choices in the planning process (better than “I think”).
- if you are active and committed to what you do

Etiskt förhållningssätt

- Vid grupparbete har alla i gruppen ansvar för gruppens arbete.
- Vid examination ska varje student ärligt redovisa hjälp som erhållits och källor som använts.
- Vid muntlig examination ska varje student kunna redogöra för hela uppgiften och hela lösningen.
