FDD3451 Individual Course in Computational Biology 7.5 credits

Individuell kurs i beräkningsbiologi

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Course syllabus for FDD3451 valid from Spring 2016

Grading scale

Education cycle

Third cycle

Specific prerequisites

Admitted doctoral student in computational biology or in a close field.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

The course should offer specialisation in a subject within computational biology.

Course contents

Studies of books and/or research articles, individually or in groups.

Examination

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

Written assignments

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
