

FEK3154 Topics in Electromagnetic Interactions with Microsystems IV 3.0 credits

Ämnen i elektromagnetiska interaktioner med mikrosystem IV

This is a translation of the Swedish, legally binding, course syllabus.

If the course is discontinued, students may request to be examined during the following two academic years

Establishment

Kursplanen gäller från och med HT2025 enligt fakultetsnämndsbeslut: J-2024-0270.
Beslutsdatum: 2024-08-27.

Grading scale

P, F

Education cycle

Third cycle

Specific prerequisites

MSc degree in electrical engineering, technical physics, or equivalent. Furthermore, the student must be enrolled in a PhD student programme with a project in the interdisciplinary field of electromagnetic waves and microsystems. Successful completion of the FEK3153.

Language of instruction

The language of instruction is specified in the course offering information in the course catalogue.

Intended learning outcomes

In the course of these meetings, the student will be able:

- To critically analyze a the technical content of a scientific review article in the field on an advanced level.
- To critically analyze the quality of review paper writing on an advanced level.
- To present a scientific review paper on an advanced level, in his/her field, but not of his/her own work, to a critical audience.
- To write his/her own review papers with improved quality, on an advanced level.

Course contents

Monthly meetings, with every event having a presentation phase, a technical discussion phase, and a scientific writing phase. Before each event, a homework must be submitted to the examiner with an analysis of the journals under discussion.

Examination

- EXA1 - Examination, 3.0 credits, grading scale: P, F

Based on recommendation from KTH's coordinator for disabilities, the examiner will decide how to adapt an examination for students with documented disability.

The examiner may apply another examination format when re-examining individual students.

Other requirements for final grade

To get the full credits after a full academic year period, the student must:

- be present at 10 meetings (corresponding to a full academic year)
- have been at least once in the presenter, and at least once in the moderator's role
- have submitted all homework assignments in time

Ethical approach

- All members of a group are responsible for the group's work.
- In any assessment, every student shall honestly disclose any help received and sources used.
- In an oral assessment, every student shall be able to present and answer questions about the entire assignment and solution.
